

CENTRALIZED EXCHANGE / PRODUCT DESIGN / USER EXPERIENCE

BYBIT

TOP 6 REASONS TO USE IT

WHAT BYBIT DOES DIFFERENTLY - AND WHY THOSE DIFFERENCES CAN MATTER TO AN ORDINARY USER.

TYPE	CORE MARKETS
CUSTODIAL CEX	SPOT + DERIVATIVES
FOCUS	ACCESS
INTEGRATED TOOLS	REGION-DEPENDENT

THE REAL DIFFERENCE

Bybit's advantage is not merely having more products. It connects a home ecosystem asset, account-specific services and advanced tools that would normally be spread across different platforms - then **places them inside one exchange workflow.**

01 REASONS SIX THROUGH FOUR

06

MANTLE: BYBIT'S CORE ASSET

MNT is integrated across eligible fee payments, VIP calculations and token-launch programs while also serving as Mantle Network's gas and governance token.

User advantage: one asset connects exchange perks with an independent Layer 2 ecosystem.

OPEN MNT PROGRAM

05

A COMPLETE ISLAMIC ACCOUNT

A separate no-interest environment combines screened tokens with Spot Trading, DCA and Spot Grid. Bybit names CryptoHalal and ZICO Shariah as advisers.

User advantage: account-level separation rather than checking each normal exchange feature individually.

OPEN ISLAMIC ACCOUNT PAGE

04

POLYMARKET THROUGH BYBIT

Eligible users can access selected Polymarket markets with USDC from their Unified Trading Account while Bybit Alpha handles the onchain interactions.

User advantage: no separate Polymarket account, external wallet or gas handling.

OPEN PREDICTION GUIDE

02 PREDICTION ACCESS PATH

POLYMARKET WITHOUT LEAVING THE UTA.

UTA BALANCE

USDC already held in the Bybit account.

>

BYBIT ALPHA

Intermediary, account display and gas handling.

>

POLYMARKET

Underlying market, liquidity and resolution.

CHECK BEFORE TRADING: selected markets only, region restrictions, market-order execution and two documented fee layers.

03 MNT INTEGRATION MAP

ONE ASSET, TWO CONNECTED ECOSYSTEMS.

FEE PAYMENTS

Eligible users can pay supported trading fees in MNT and receive the applicable discount.

VIP MULTIPLIER

Bybit gives MNT extra weight when calculating asset-based progression toward higher VIP tiers.

LAUNCH ACCESS

MNT can participate in Launchpool, Launchpad, Megadrop and Token Splash programs.

MANTLE NETWORK

The same token pays gas and participates in governance on an independent Ethereum Layer 2.

THE TOP THREE: HEDGING, RECOVERY, CRISIS RESPONSE

These features matter most when markets or the exchange itself are under pressure.

03

PERP PROTECT

Bybit links an eligible perpetual position to a recommended options hedge.

LONG

Buy a put option that can gain value below its strike.

SHORT

Buy a call option that can gain value above its strike.

WHY

Direction, size and cost are connected to the open position.

Limits: option premium required; UTA Cross Margin only; eligible underlyings only; liquidation can still occur; payout depends on expiry conditions.

02

LAZARUSBOUNTY

A public recovery network turns wallet tracing into an open, financially incentivized process.

TRACE

The first qualifying reporter submits verifiable evidence.

FREEZE

An exchange, issuer or other entity stops recoverable funds.

BOUNTY

10% of recovered value: 5% for tracing and 5% for freezing.

Limits: recovery is not guaranteed; Bybit controls program eligibility; most stolen assets may remain untraceable or inaccessible.

01

WITHDRAWALS STAYED OPEN

The February 2025 breach became a real-world test of liquidity, communication and operations.

21 FEB

Approximately USD 1.5B stolen from an Ethereum cold wallet.

HOURS

CEO Ben Zhou appeared publicly and answered questions live.

10 HRS

Bybit reported 99.994% of 350,000+ withdrawal requests processed.

<12 HRS

Bybit reported the withdrawal backlog cleared.

~72 HRS

The exchange reported its customer ETH reserve gap closed.

Limits: this was still a catastrophic control failure. Past crisis handling cannot guarantee future solvency, access or security.

05

BEFORE USING ANY EXCHANGE

CHECK THE PRODUCT AND THE CUSTODIAN.

JURISDICTION

Confirm your country, entity, identity-verification status and product eligibility.

EXIT PATH

Test a small withdrawal before placing significant funds with a custodian.

ALL-IN COST

Review trading, service, prediction, funding, option-premium and withdrawal fees.

INCENTIVE TRADEOFF

Compare an MNT fee discount or reward with token-price risk and changing program rules.

ALPHASTACK CONCLUSION

INTEGRATION IS THE PRODUCT.

Bybit is strongest where it reduces the number of accounts, wallets and specialist interfaces required to use advanced products.

That convenience does not remove custody, leverage, token-price, third-party or regulatory risk.

06

FOUR RISKS THAT REMAIN

CENTRALIZED CUSTODY

Bybit controls account access and holds assets. Proof of reserves is useful but is not deposit insurance.

REGIONAL ACCESS

Islamic, Prediction, options and derivative products can be restricted or changed by jurisdiction.

LEVERAGE + OPTIONS

Protective tools reduce selected risks; they do not eliminate liquidation, premiums or total-loss scenarios.

THIRD-PARTY RAILS

Prediction resolution, advisers, option markets, wallets and recovery partners create additional dependencies.
